THE DEATH OF SCHOOLING AND THE BIRTH OF LEARNING
A Horizon Forum with Professor Stephen Heppell

Bastow’s first Horizon Forum will outline how education is changing in response to technology, globalisation and the dynamics of a joined-up world.

ABOUT THE SESSION

Professor Heppell will outline some of the ways in which he sees education needing to change to adapt to these issues and what might be some of the outcomes of such changes on schools, schooling and the learning of children and young people.

This session will cover:

* Future trends in education shaping teaching and learning – what is taught and why.
* Technology impact now and into the future – what might it look like, how will students learn and where.
* How can teachers respond to these changes now and prepare for what is to come – changes in classroom practice.
* How can educational leaders create the conditions to enable effective adaptation to these changes – for staff and for the school community.
* The characteristics of education authorities and individual schools from around the world that will do well this century and how this can be applied to the Australian education setting.

ABOUT THE FACILITATOR

Professor Stephen Heppell is a leading voice in ICT in learning and is Professor of New Media Environments at the Centre for Excellence in Media Practice at Bournemouth University, UK.

Stephen founded and ran Ultralab for almost a quarter of a century, building it into one of the most respected research centres in e-learning in the world – at one time Ultralab was the largest producer of educational CD-ROMs in Europe – before leaving it in 2004 to found his own global and flourishing policy and learning consultancy heppell.net which now has an enviable portfolio of international projects all round the world.

Stephen’s “eyes on the horizon, feet on the ground” approach, coupled with a vast portfolio of effective large scale projects over three decades, have established him internationally as a widely and fondly recognised leader in the fields of learning, new media and technology.

Stephen has worked, and is working, with governments around the world, with international agencies, Fortune 500 companies, with schools and communities, with his PhD students and with many influential trusts and organisations.
