

ICT Peer Coaching Accreditation

Microsoft ICT Peer Coaching Training Accreditation

Overview: Recent studies by educational leaders suggest the benefits of schools having an explicit focus on building teacher capacity through reflective practices, has the greatest impact on classroom performance. We also know that teacher quality has the greatest impact on student performance and outcomes. ICT Peer Coaching is an internationally recognised Microsoft course that accredits participants with a Microsoft and Peer Ed ICT Peer Coaching certification to support teachers within their school with the integration of ICT into their teaching practice. Through this two day workshop, teachers and leaders will explore the Peer Coaching methodologies and protocols that can be applied across all teaching and learning areas. Participants will spend time exploring technical pedagogy frameworks and equipped with resources to successfully implement a coaching program back at school. This course is suitable for Primary and Secondary school educators.
