

Microsoft STEM Ed Experience

Learning for today and tomorrow

McGuire College,
Shepparton, VIC

Classrooms are fast becoming abuzz with Beebots, Littlebits, Makey Makeys, and coding academies. With the digital technologies and design technologies curriculum upon us, and a global focus on STEM and innovation, navigating this landscape can be daunting. It's time to think more deeply about the learning we are wrapping around these tinker tools and explore ways we can engage students in deeper learning and develop transferable STEM Ed skills for the future.

What will I learn from it?

Let's work smarter, not harder when it comes to embedding STEM into your classroom practice. You will walk away from this workshop with the skills and strategies to help your students make what's next in this ever-changing world. Places will fill quickly for this whole-day workshop, so please register today.

What does the day look like?

- 9:00 – Registrations Open
- 9:30 – Collaborating with Office 365 and OneDrive
- 11:00 – Morning Tea
- 11:30 – Explore Microsoft tools freely available to support learning in today's STEM classrooms
- 12:15 – Get hands on and collaborate with other teachers and schools on STEM activities
- 13:00 – Lunch
- 13:30 – Experience Minecraft Education Edition and how to get started in your school
- 14:30 – Participate in a TeachMeet to hear and share with other regional Primary and Secondary schools already walking the STEM path
- 15:30 – Finish
