

Streamlining Assessment with Microsoft Forms

Microsoft - Southbank, VIC

"For teachers to be able to develop new approaches to formative assessment and relate them to different theories of learning, they must be able to investigate and reflect upon their own classroom practices – particularly the way they question and give feedback to students." - H. Torrance, & J. Pryor

What is Microsoft Forms?

Do you need a quick and easy way to collect data to determine your students' progress or do a quick pre-assessment to find out what students already know about a unit of study? Microsoft Forms can help! Forms is the result of direct feedback from educators who told us they need an easy way to assess student progress on an ongoing basis. They also told us they want an assessment solution that will save them time, help differentiate instruction for all students and provide quiz takers with real-time personalised feedback.

With Microsoft Forms, you can:

Create forms in minutes

Send forms to anyone

See results in real time

What will I learn?

You will learn how to create multiple choice and short answer assessments in a few simple steps. You will discover how to insert different kinds of questions and set options quickly and easily.

You will be shown how to send forms to your students via email, a link or QR-code and how they can receive immediate feedback as they take the assessment. You will also learn how student assessment data is presented within Forms and how to export it to an Excel spreadsheet with one click, saving you precious time.

You will see real examples of how teachers in secondary, primary and early-years contexts save time using Microsoft Forms.

Where do I sign up?

Register at:

<https://aka.ms/streamliningassessments>

Date: Monday 29th May 2017

Time: 4:30 – 6:00 PM

Location: Our Lady of the Sacred Heart College,
111 Jasper Road Bentleigh VIC 3204

Cost: Free
